## CHERRY WAX

**DESCRIPTION:** Cherry Wax is designed for many different maintenance profiles including frequent ultra high speed burnishing. Cherry Wax has rapid gloss build and long term wear properties. Cherry Wax can be maintained through regular maintenance procedures of dry and damp mopping with limited or frequent ultra high speed burnishing including the use of propane burnishing equipment. Educational institutions, health care facilities, large mall areas and chain retail stores are but a few of the applications where Cherry Wax will yield shining results.

**DIRECTIONS:** Do not dilute. Pour on to sealed surface and mop using a synthetic mop or a rayon mop applicator. The floor may be maintained between coats of Cherry Wax with a mild soap and water. When floor begins to look dull, apply Cherry Wax. *Note:* Cherry Wax is not a sealer, but is intended to protect and extend the life of the sealer.

### **KEY PERFORMANCE PROPERTIES:**

- Rapid gloss build
- Balanced scuff and black mark resistance
- Balanced detergent resistance and removability
- Withstands repeated damp mop and machine scrub cycles without overly aggressive mechanical activity.
- Exceptional application and lay-down characteristics.

**NOTES:** Up to seven coats may be applied with 15 minutes drying time each coat.

### **TECHNICAL DATA:**

Weight solids..... 21%  
Density ..... 8.54 lbs per gallon  
Typical pH ..... 8.00  
Specific gravity ..... 1.025
